

Vbrick® Rev® Extends Cisco WebEx with Native Integrations

Rev is Cisco's Enterprise Video Management Solution to Manage WebEx Recordings and Live Stream WebEx Meetings to Global Audiences

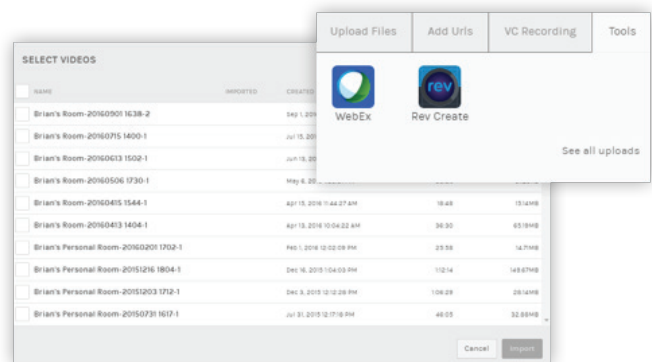

Rev offers WebEx customers a seamless solution for extending the value of their WebEx investment. Rev provides the enterprise content management that adds easy video management to WebEx recordings including tools for metadata and speech search, access control, content expiration, efficient video playback and caching, speech to text transcription services, online video editing and much more.

Additionally, Rev extends the value of WebEx by integrating directly to WebEx CMRs to enable live streaming to global audiences. Rev's unique SIP integration to meeting rooms allows users to host broadcasts from any WebEx-compatible TelePresence endpoint. This allows users to host broadcasts with multiple presenters in multiple locations. Live streaming directly via Rev's integration allows WebEx to be the video source for live streaming events for thousands of simultaneous global participants.

LIVE STREAMING

IMPORT RECORDINGS

REV EXTENDS WEBEX BY:

- ▶ Ingesting meeting recordings to share, permission, organize, transcribe, and edit
- ▶ Live streaming to large audiences using Rev's video conference integration to SIP enabled WebEx CMR meetings
- ▶ Hosting live internal webcasts or external webinars with presenters in multiple locations
- ▶ Converting TelePresence endpoints into broadcast studios for streaming and recording using WebEx as the user interface to share video and content
